Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/506,892	Applicant(s) SAKAMAKI ET AL.	
	Examiner Steven E. Holton	Art Unit 2629	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 9-13, 21, 31-33, drawn to a paper-type display medium with specific recording portions, classified in class 345/107.

Group 2, claim(s) 1-8, 34, 37, 38, 41, 42, 45, and 46, drawn to a system and method of receiving contents and a content code and displaying information on a paper-type display medium, classified in class 700/235.

Group 3, claim(s) 14-20, 43, 44, and 47-49, drawn to a system and method of receiving contents and a content code and displaying information on a display device based on information from a paper-type display device, classified in class 700/235.

Group 4, claim(s) 22-25, drawn to a system of receiving contents and a content code and displaying information on a paper-type display based on a content code and arbitrary code stored on the paper-type display, classified in class 700/235.

Group 5, claim(s) 26-30, drawn to an information system displaying information on a paper-type display unit based on time information, contents codes, and permission information, classified in class 700/235

Group 6, claim(s) 35, 36, 39, and 40, drawn to a point system for selecting and editing contents based on a content code and then displaying the selected and edited contents on a paper-type display medium, classified in class 700/235.

The inventions listed as Groups 1 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the paper-type display devices are a separate class of invention separate from the information systems and methods. The paper-type displays require specific manufacturing and construction methods that are technically different and could be used in systems other than the

Art Unit: 2629

information distribution systems. The various information distribution systems require different specific systems including publication to display devices or to paper-type display devices, editing and selection systems for editing data to be later displayed on devices and various methods of determining the contents to be displayed and stored within the system.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
